SUMMARY

I am an extremely passionate, dedicated, and enthusiastic UI/UX Designer who absolutely loves the field of user experience design and human computer interaction. I have always been deeply fascinated by the way humans interact with technology and how thoughtful design can make those interactions seamless, intuitive, joyful and deeply meaningful. My journey into design started back in 2018 when I first discovered the incredible world of Figma and was blown away by how powerful visual design tools could be. Since then I have been on an incredible learning journey, reading every book I can find on design thinking, taking every course available, watching countless YouTube tutorials, and most importantly practising my craft every single day without fail. I genuinely believe that design is not just a job for me but a calling, a way of life, a philosophy that governs how I see the world. I wake up every morning excited to solve problems, empathise with users, create beautiful interfaces, and make a positive difference in people's lives through the power of thoughtful, human-centred design. I am also very much a team player who loves collaborating with cross-functional teams including engineers, product managers, stakeholders, and of course real users. I always bring positive energy, enthusiasm, and a growth mindset to every team I join.

SKILLS

Design Tools: Figma, Adobe XD, Photoshop, Illustrator, InVision, Sketch, Zeplin, Framer, ProtoPie, Marvel

Research Methods: User Interviews, Usability Testing, Surveys, Card Sorting, Heuristic Evaluation

Other: HTML, CSS (basic), PowerPoint, Canva, Notion, Miro, Trello

EDUCATION

B.Sc. in Visual Communication — University of Rajasthan

2022 72%

EXPERIENCE

UI Designer (Freelance) — Self-Employed

2022 – Present

- Designed logos and social media graphics for small local businesses in Jaipur.
 - Created UI screens for a mobile app concept that was never launched.
 - Helped a friend's startup with some basic Figma wireframes.
 - Watched many case studies and redesign challenges on YouTube and tried to replicate them.
-

PROJECTS

Food Delivery App Redesign (Concept)

Tech: Figma

I took an existing popular food delivery app and completely reimagined it from scratch. I spent a lot of time thinking about how users feel when they open the app, what their pain points might be, and how I could make the experience so much better. I created mood boards, colour palettes, typography studies, icon sets, and then finally moved into wireframing and high fidelity design. The final prototype has over 30 screens covering the full user journey.

CERTIFICATIONS

- Google UX Design Certificate (in progress)
 - Adobe Certified Associate – Visual Design
-

ACHIEVEMENTS

- Completed 30-day UI design challenge on Twitter/X
