SUMMARY

ML Engineer with 4 years of experience deploying production ML systems at scale. Deep expertise in NLP, computer vision, and MLOps. Shipped 6 models to production serving 10M+ users. Strong believer in responsible AI and model interpretability.

SKILLS

ML/AI: PyTorch, TensorFlow, Scikit-learn, HuggingFace Transformers, XGBoost, LightGBM

MLOps: MLflow, Kubeflow, DVC, Seldon Core, Feast (Feature Store)

Languages: Python, SQL, Bash

Cloud: GCP (Vertex AI, BigQuery, GCS), AWS SageMaker

Data: Apache Spark, Pandas, Airflow, dbt

EDUCATION

M.Tech in AI & ML — IIT Hyderabad

2020 CGPA: 9.1/10

B.E. in Electronics — BITS Pilani

2018 CGPA: 8.4/10

EXPERIENCE

ML Engineer II — Swiggy

Aug 2021 – Present

- Designed and deployed a delivery time prediction model (LightGBM + real-time features) reducing average ETA error by 31% and improving customer satisfaction NPS by 8 points.
- Built an end-to-end MLOps pipeline on Kubeflow handling 200+ daily model retraining jobs with automated drift detection and rollback.
- Led NLP project to auto-tag 5M+ restaurant menu items using fine-tuned BERT, achieving 94.7% tagging accuracy and eliminating 3,000 hrs/month of manual effort.
- Implemented A/B testing framework for ML models now used by 4 teams across the org.

Data Scientist — Mu Sigma

Jul 2020 – Jul 2021

- Built churn prediction model (Random Forest + SHAP) for a US telecom client, enabling targeted retention campaigns that reduced churn by 14%.
 - Developed time-series demand forecasting models (ARIMA, Prophet) improving inventory accuracy by 22% for an FMCG client.
-

PROJECTS

MediScan – Medical Image Segmentation

Tech: PyTorch, U-Net, DICOM, FastAPI

Semantic segmentation of chest X-rays for pneumonia detection. Achieved 96.2% sensitivity and 94.8% specificity on NIH Chest X-ray dataset. Deployed as REST API.

SentimentFlow – Real-time Social Sentiment

Tech: HuggingFace, Kafka, Redis, Grafana

Streaming sentiment analysis pipeline on Twitter/X data with <500ms end-to-end latency. Fine-tuned RoBERTa achieving F1 of 0.89.

CERTIFICATIONS

- Google Professional ML Engineer (2023)
 - Deep Learning Specialization – Coursera (deeplearning.ai)
-

ACHIEVEMENTS

- Best Paper Award – ICLR Workshop on ML Systems 2022
- Kaggle Competition: Top 3% in IEEE Fraud Detection Challenge
