SUMMARY

Fresher ML Engineer with strong academic foundation in machine learning and deep learning. Completed multiple Kaggle projects and online certifications. Looking for an entry-level ML role to apply academic knowledge to real-world problems.

SKILLS

ML/AI: Python, Scikit-learn, TensorFlow, Keras, Pandas, NumPy

Concepts: Supervised/Unsupervised Learning, CNN, RNN, NLP basics, Model Evaluation

Tools: Jupyter Notebook, Google Colab, Git, Docker (basic)

Other: SQL, Matplotlib, Seaborn

EDUCATION

B.Tech in Computer Science (AI Specialization) — Amity University, Noida

2024 CGPA: 8.2/10

EXPERIENCE

ML Intern — Analyttica Datalab

Jan 2024 – Apr 2024

- Assisted in building a sentiment analysis model using LSTM on customer review data achieving 82% accuracy.
 - Performed data preprocessing and feature engineering on 200K row dataset reducing noise by 18%.
 - Created visualizations and model evaluation reports for team review.
-

PROJECTS

Crop Disease Detection

Tech: TensorFlow, CNN, Streamlit

Image classification model to detect 10 crop diseases from leaf images. Trained on PlantVillage dataset achieving 91% validation accuracy. Deployed as Streamlit web app.

Movie Recommender System

Tech: Python, Collaborative Filtering, Flask

Content and collaborative filtering based movie recommender using MovieLens dataset. REST API deployed on Heroku.

CERTIFICATIONS

- Machine Learning – Stanford (Coursera)
 - TensorFlow Developer Certificate
-

ACHIEVEMENTS

- Kaggle Notebooks Expert badge
- Ranked Top 10% in Kaggle Tabular Playground Competition
